PROFESSIONAL EXPERIENCE

The Blackstone Group, Technology & Innovations Division

New York, NY

Product Manager & UX Designer

March 2022 – Present

- Manage the software development lifecycle for two business-facing applications servicing Blackstone's alternative asset management business. Platforms provide 500+ users with insights into portfolio companies, investment lifecycles, and quantitative returns for deal teams in the private equity and real estate sectors.
- Lead the Blackstone Design System's Agile sprint planning and component creation with a team of 10+ developers and QA engineers to determine client needs, enhancements, and triage work as necessary; team scrum master.
- Facilitate the combination and collaboration of disparate data sources for client-facing visualizations providing insight into the firm's portfolio operations initiatives, such as human capital management and talent acquisition.
- Conduct extensive user acceptance testing, research, and interviews to determine optimal feature design and produce functional and aesthetic solutions to user-identified problems.

Project Highlights

- Designed Private Equity Portfolio Summary View using feedback sourced over the course of 22 user interviews. Feedback and research template published cross-firm in promotion of document standardization across products.
- Managed the design and development of the BX UI Design System, estimated to save over 200 annual design and front end development hours. Researched, created, and published a firm-wide product development lifecycle framework to promote effective usage of the system and maintain design-based best practices across teams.
- Designed BX Life Sciences Sourcing Engine, subsequently endorsed by Life Sciences leadership with expedited development. Blackstone's first application to encompass investment data in both MedTech and Biopharma sectors.

Virtu Financial, Inc.

New York, NY

Product Manager

August 2020 – March 2022

- Managed the software lifecycle and business development of a trading platform, Triton Execution Management System (EMS), which specializes in tools for equity, fixed income, and foreign exchange trading. Triton EMS was awarded the top-ranking position for the second consecutive year in The TRADE's global 2021 EMS Survey.
- Maintained all Consolidated Audit Trail (CAT) reporting, resolving client errors in a timely and precise manner.

Investment Technology Group (ITG)

New York, NY
